of organizing and participating in
the research school for a duration of
two months.

ABOUT ME

With over three years of experience in the Student Health Council, I have undertaken various leadership roles, most recently serving as the Head of the Initiatives Committee. I am currently pursuing a degree in Applied Medical Sciences with a specialization in Public Health at King Faisal University, and I expect to graduate in 2027. I am proficient in key statistical programs such as OpenEpi, JASP, and JAMOV, enabling me to analyze data and effectively develop public health policies. My professional approach is based on precise analysis and strategic planning, contributing to the development of health initiatives within the council and supporting public health effectively.

EXPERIENCE

2022

-

2023

Writer at the Cultural Club

Student Health Council

- During my membership in the Cultural Club, I developed my scientific, research, and awareness writing skills, as well as my ability to write weekly reports in both Arabic and English.
- I also delivered several scientific lectures, which contributed to enhancing my public speaking skills.

2023

-

2024

Administrator

Student Health Council

- I was promoted to an administrative role in the Student Health Council, where I coordinated events and initiatives, improving my time management, problem-solving, and organizational skills. During this time, I also joined the research school to enhance my research skills alongside four experienced professors.
- I initiated and fully supervised the Wiqaya initiative.

2024

-

2025

Head of the Initiatives Committee

Student Health Council

- After the success of the "Wiqaya" initiative in the Student Health Council, I was promoted to Head of the Initiatives Committee. This role enhanced my leadership skills, strengthened community partnerships, and allowed me to initiate, implement, and manage projects for the College of Applied Medical Sciences.

2024

-

2025

Trainee at the Public Health Clinic

Medical Clinics Complex at King Faisal University

- I became a trainee at the Public Health Clinic in the Medical Clinics Complex under Dr. Ghazi Al-Jouf, Head of the Public Health Department. This experience helped me develop administrative, research, and communication skills to improve community health, raise awareness, and enhance the quality of health outcomes.
